Because Applicant has cancelled all non-elected claims the restriction requirement of August 17, 2005 has been withdrawn.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 11-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Hagge et al. With regard to claims 11 and 14, Hagge et al show a probe station having a housing enclosing a carrier 10 with a surface 14 on which a wafer or chip is placed, a probe assembly 18, 30, 32, 29, 31 within the housing and an environmental control system wherein temperature controlled fluid is circulated to the carrier 10 to control the temperature of the interior of the housing. With regard to claim 12, a vacuum is drawn through tubes 16 which will inherently create a partial vacuum in the interior of the housing. With regard to claim 13, relative motion is provided between the probes and the device tested by moving

shaft 12 which is surrounded by manifold 22 containing a temperature controlled fluid.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tracy, Margozzi, Blanz, Miyata et al, Schwindt et al, Leas and Miyazawa et al are cited to show additional test apparatus having temperature control apparatus using a fluid.
